

Iowa Stalks Monthly Newsletter - September 2018

This Month at ASHRAE Iowa

Note the new start time this year!!

President's Corner

Welcome to a new ASHRAE year!

ASHRAE lowa Chapter www.ashraeiowa.org

I hope everyone had a great summer and are

ready to kick off the 2018-2019 ASHRAE lowa Year! Our Board of Governors are off to a great start planning an exciting year for us. We plan to offer lots of PDH opportunities mixed in with fun social events.

The Fall Frolic Golf Outing will kick off our year on Wednesday, September 12th at The Legacy Golf Club in Norwalk. I hope you were able to get a foursome put together and plan to join us. Note the earlier 11 AM shotgun start. Hopefully the weather has gotten all this rain out of its system this past wet week so we will have great sunny weather for our event. As of now, the weather report is looking fantastic! There is still time for your company to help sponsor our golf event. The proceeds from the golf outing help raise money for ASHRAE Research Promotion which funds research and grants right here within our region.

The following month will be at the Ramada Tropics Resort on Merle Hay on October 17th. Our Chapter Technology Transfer Committee (CTTC) chairs are working out the final details of the event, so be on the lookout for additional details soon!

In November, we will make our annual trip up to Ames for student night. We hope to provide some educational networking with soon-to-be engineers that will enter our industry in the near future. We will also get to tour the recently renovated historical Marston Hall, so mark your calendars so you can make the trip up there and join us.

Stay tuned for additional details on the rest of our monthly meetings. I'm looking forward to seeing you all there. Thanks for supporting your local

Upcoming Meetings

Mark your calendars! The chapter is working hard to put on a great set of events this year and we hope to see you there.

Iowa Chapter Future Meetings

Month	Date	Location	Topic
September	12	The Legacy Golf Club	Fall Frolic Golf Outing
October	17	Ramada Tropics	Membership & RP Night
November	14	Ames	Student Night & Tour
December	12	Holiday Inn	SMCI / CSI Joint Meeting
January	17*	TBD	TBD
February	15*	Hotel Renovo	Refrigeration Meeting

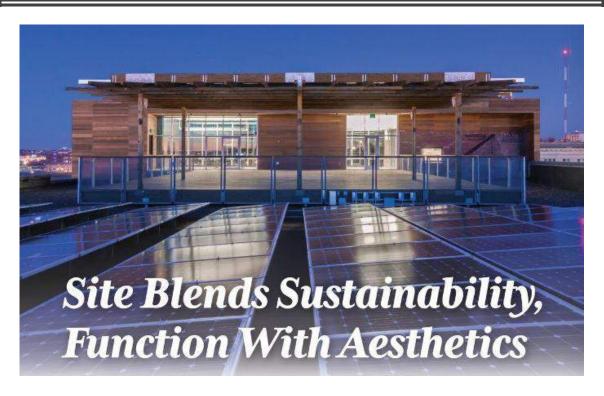

March	28*	TBD	MP, RP, & History Project
April	18*	Val Lanes	Chapter Meeting and Bowling Tournament
April	19*	At Your Desk!	ASHRAE Webcast
May	14*	TBD	Spring Fling Golf Outing

Society & Region Events

Month	Date	Location	Topic
January	12-16	Atlanta, GA	2019 Winter Conference
May	2-4	Milkwaukee, WI	Region VI CRC
June	22-26	Kansas City, MO	2019 Annual Conference

^{*}Tentative dates

What's New in the Iowa Chapter?

Congratulations to ASHRAE lowa members Chris Deal and Mark Hersch for winning First Place Technology Award in the Commercial Buildings - Existing category. The project involved the renovation of the historic Advanced Thresher Company Warehouse in the East Village. Take a look at the project in the <u>July issue of the ASHRAE digital journal</u>.

Des Moines is exploring an energy benchmarking initiative using EnergyStar. The initiative is intended to help building owners and tenants be more informed about the potential problems, savings, and performance of the largest buildings in Des Moines downtown area. It is similar to other programs already in use at other Midwest cities such as Kansas City, Minneapolis, and Chicago. Read more about the proposed initiative here and here.

Research Promotion

Please consider donating to RP if you haven't already. With the new year, we have a new goal. Any donation is helpful and appreciated. If you have any specific questions about how your donated money will be used, <u>please contact Michael Gustafson</u>.

ASHRAE Iowa Research Investors 2017-2018 Go to http://ashraerp.com to donate online. Please contribute all donations to the Endowed Research via ASHRAE Foundation.

This year, the BOG is encouraging you to donate online in an effort to save paper and increase the efficiency of the RP donation process. Please visit the ASHRAE RP Donation page here. ASHRAE provides options for you to determine where to place your donation. The lowa Chapter is looking to increase its endowment and would appreciate it if you would place your donation in the box available next to "Endowed Research via ASHRAE Foundation", check the box indicated that you understand that those funds are restricted for the support of ASHRAE Research, and put "lowa Chapter" in the "Existing Fund Name (If known):" box. From there it's as simple as any other online purchase with a credit card.

Don't forget that ASHRAE is a 501(c)(3) organization. Contributions are deductible as allowed by law. A receipt will be sent to the address listed above.

If you would still prefer to donate by check or have any further questions about the donation process, <u>please contact Michael Gustafson</u>.

Thank you for your donation!

Selecting Fans for Minimum Energy Consumption

By Michael Brendel, Ph.D., Member ASHRAE

According to the author, fan selection has largely become an automated process that matches system flow and pressure requirements to a pool of candidate fans. Tradeoffs between first cost and power consumption often drive selections to the smallest fan, rather than to the most efficient. This article discusses proper fan selection with emphasis on how fan pressures and selection practices influence the result.

Propane-Burning Heat Pump Promises More Efficiency, Environment-Friendliness

MUNICH, Germany—Researchers at the Fraunhofer Institute for Solar Energy Systems are developing a heat pump that uses propane. Propane has excellent thermodynamic properties, but is highly flammable. To mitigate the flammability impact, the volume of propane in the heat exchanger is minimized by using compact, brazed, finned heat exchangers. The team says it is "currently modifying the technical design of the heat pump, testing the long-term behavior of its components, and developing sustainable safety strategies."

University of California Commits to 100% Renewable Energy by 2025

BERKELEY, Calif.—The University of California announced Sept. 4 that it will use 100% renewable and zero-carbon electricity by 2025. All 10 UC campuses and five medical centers have agreed to the plan. The University also committed to reducing its energy use intensity (energy per square foot per year) by 2% annually through the use of efficiency measures. In addition, the university said that after June 2019, no new buildings or major renovations will use on-site fossil fuel combustion for space and water heating.

New Software Tool to Help Design More Efficient Buildings

CAMBRIDGE, Mass.—MIT researchers have developed a faster and easier system for performing a life-cycle analysis of a building's environmental impact. The new process is simple enough that it could be integrated into the software already used by building designers, according to its developers. "We wanted to address how to bridge that gap between using LCA at the end of the process and getting architects and engineers to use it as a design tool," said Franz-Josef Ulm, Ph.D., a professor of civil and environmental engineering and director of MIT's Concrete Sustainability Hub.

ASHRAE Learning Institute

Check out ASHRAE eLearning for more than 90 courses available on your computer. These courses have been created by HVAC&R professionals using ASHRAE's extensive pool of knowledge and most courses are recognized PDHs by AIA and GBCI (confirm with licensing body for specifics). Course options include:

- Introduction to Refrigerants
- Refrigerant Selection
- Refrigerant Management
- Ethics for the Built Environment Professional Engineer
- Standard 62.1-2013: Natural Ventilation Procedure
- Using Standard 90.1-2010 to Meet LEED Requirements
- Building Information Modeling
- Humidity Control Design: Basic Principles, Loads and Equipment
- Standard 189.1 for High-Performance Green Buildings Energy Efficiency
- School of Hard Knocks: Controlling Moisture & Humidity in Buildings
